About

I am self taught web development and design. I enjoy building websites with a beautiful and professional user interface using HTML, CSS, Vanilla JS, and JavaScript with React, jQuery and Angular frameworks. I have some knowledge about graphic design using Adobe XD, Illustrator, and Photoshop. I am currently in school for Back End and improving myself in Front End.

Awards

5 years experienced in sales

Top Salesman in the region

Education

Present

2019

Certificate in Apis And Microservices

Free Code Camp

Building web applications with Node JS and using Mongo DB and Mongoose Schema to save the data on the server. In addition, I used a few Node JS npm's such as multer, and socket io. Accomplished projects so far are exercise tracker, file meta data, shortened url, and timestamp api.

2019
